Summary

Software Engineer & Tech Founder with a focus on retail intelligence and innovative tech solutions. Currently leading frontend development for **Epsilon**, where I secured incubation from the **Veysəloğlu Group** and am managing the technical integration of the "Rate & Earn" module for the **OBA Market** mobile ecosystem. A highly decorated competitor with multiple **1st place hackathon wins** and an **IELTS 8.0**, specializing in building high-performance web interfaces and collaborating in fast-paced startup environments.

Experience

Co-Founder | Head of Corporate Relations & App Developer| Epsilon
Baku, Azerbaijan | Sept 2025 – Present

- **Strategic Leadership:** Pitched the Epsilon retail-tech vision directly to the CEO of **OBA Market** and top executives at **Veysəloğlu Group**, successfully securing corporate sponsorship and official incubation.
- **Mobile & Web Development:** Spearheaded the development of a high-performance, cross-platform mobile application using **React Native (Expo)** and **TypeScript**, delivering a seamless user experience for the "Rate & Earn" loyalty ecosystem.
- **Product Integration:** Leading the technical implementation of the Epsilon module directly into the official **OBA Market** mobile app, managing the product lifecycle from prototype to production-ready mass-market rollout.
- **Collaborative Execution:** Working on-site with OBA's internal IT department to ensure code quality, security compliance, and seamless technical integration within the existing corporate software infrastructure.

Education

Bachelor of Computer Science 2nd Year
–**Baku Higher Oil School (2024 – 2029)**

Full Stack Web Development & Computer Science
– Holberton School Azerbaijan (2025 – 2026)

Volunteering
